Open to international remote opportunities and relocation.

## Professional Summary

Software development experience at MTEC Energia since 2024, building internal systems, integrations, dashboards, and process automations. Hands-on work with JavaScript, Node.js, Vue.js, and SQL, plus recent development using NestJS, TypeScript, and MariaDB. Experience with REST APIs and Linux application support. Completing a bachelor's degree in Computer Science.

## Professional Experience

### MTEC Energia | IT Intern - Systems Development and Automation

Sep 2025 - Present

- Develop and improve document automation workflows using templates and integrations with signing and delivery APIs, streamlining a process that previously required approximately 30-40 minutes of manual preparation and review.
- Contribute to an internal HR system using NestJS, TypeScript, and MariaDB, involving REST APIs, access control, and automated testing. The project is under development.
- Build SQL queries and integrate Sienge ERP data into reports and dashboards used by finance and other business teams.
- Maintain systems and workflows with JavaScript, Node.js, Vue.js, Node-RED, and Make; troubleshoot applications on Ubuntu Server with Apache, PM2, and Cloudflare.

### MTEC Energia | IT Apprentice - Systems Development and Automation

Sep 2024 - Sep 2025

- Built dashboards, forms, filters, and registration workflows for an EV-charging management and monitoring system in residential buildings, using JavaScript, Vue.js, Node-RED, and MySQL.
- Created Node-RED and Make automations and maintained corporate website pages using WordPress and Elementor.

## Selected Projects

### Full-Stack Portfolio | React, TypeScript, Node.js, Express, MySQL

Web application with a REST API, admin dashboard, JWT/bcrypt authentication, and Socket.IO updates. Source code and live demo are available through the links above.

### Academic Capstone App | React Native, Expo, TypeScript

In-progress mobile application integrated with an IoT scale model, focused on mobile interfaces and data integration.

## Technical Skills

**Development:** JavaScript, Node.js, REST APIs, Vue.js, HTML, CSS; React and Express in projects. NestJS and TypeScript in recent development.

**Data and automation:** SQL, MySQL, PostgreSQL, MariaDB, Drizzle ORM, Node-RED, Make, API integrations.

**Quality and tools:** Git, GitHub, Linux, Ubuntu Server, Apache, PM2, Cloudflare. Vitest and Supertest in the HR project.

## Education

Bachelor's Degree in Computer Science (in progress) | UDF Centro Universitário, Brazil

Expected graduation: December 2026.
