

CÉSAR MALUF

JUNIOR AUTOMATION ANALYST | SQL, INTEGRATIONS & PROCESS AUTOMATION

Brasília, Brazil | +55 (61) 98193-3568 | cesarcfwmaluf@gmail.com | linkedin.com/in/cesarcfw | github.com/Cesarcfw | Portfolio

PROFESSIONAL SUMMARY

Final-semester Computer Science student with hands-on experience since 2024 in process automation, internal systems, dashboards, integrations, and data processing. Works with Node-RED, Make, SQL/MySQL, and JavaScript on corporate solutions used in a real business environment, including automation support, failure analysis, SQL queries, and integration between applications, databases, and internal processes.

PROFESSIONAL EXPERIENCE

MTEC Energia — IT Intern — Systems Development and Automation

Sep 2025 – Present

- Maintain and improve e-simon and other internal systems, working with automation workflows, integrations, databases, and server environments.
- Build and maintain SQL/MySQL queries to integrate Sienge ERP data into internal reports and dashboards.
- Maintain Node-RED and Make workflows, process data, analyze failures, and support improvements to operational processes.
- Support applications running on Ubuntu Server, Apache, PM2, and Cloudflare, as well as internal systems and users.

MTEC Energia — Young Apprentice — Systems Development and Automation

Sep 2024 – Sep 2025

- Contributed significantly to the initial development of e-simon, a corporate monitoring and management solution used in a real business environment.
- Developed dashboards, forms, tables, filters, and registration workflows with JavaScript, Vue.js, HTML, CSS, and Node-RED.
- Created automations with Node-RED and Make, integrating user interfaces, a MySQL database, and internal data-processing routines.

SELECTED PROJECTS

Corporate Automation and Monitoring Dashboard — Private project. Internal application integrated with automation workflows and a database for registering, monitoring, and processing operational information; source code and business data are private.

e-simon — Monitoring and Management System — Node-RED, MySQL, JavaScript, Vue.js. Platform with dashboards, registration workflows, automations, and integrations used to support residential EV-charging operations.

TECHNICAL SKILLS

Automation & processes: Node-RED, Make, automation support, process workflows, system integrations

Data: SQL, MySQL, queries, data processing, reports, dashboards, Excel

Development & operations: JavaScript, Node.js, Vue.js, HTML, CSS, APIs, Ubuntu Server, Apache, PM2, Cloudflare

Currently learning: Basic/academic Python and RPA fundamentals; interested in Automation Anywhere and Power Automate

EDUCATION & LANGUAGES

Bachelor of Science in Computer Science: UDF Centro Universitário — expected Dec 2026

Languages: Portuguese (native); English (intermediate / professional working proficiency)
