

CÉSAR MALUF

JUNIOR SOFTWARE DEVELOPER | SYSTEMS, WEB, AUTOMATION & SQL

Brasília, Brazil | cesarcfwmaluf@gmail.com | linkedin.com/in/cesarcfw | github.com/Cesarcfw | Portfolio

PROFESSIONAL SUMMARY

Final-semester Computer Science student with hands-on experience since 2024 developing and maintaining internal systems, web applications, dashboards, database routines, integrations, and process automations. Contributes to solutions used in a real business environment and is seeking Junior Software Developer, Junior Systems Analyst, or Junior Full-Stack Developer opportunities. Based in Brasília, Brazil; open to Remote, LATAM, and worldwide contractor roles.

PROFESSIONAL EXPERIENCE

MTEC Energia — IT Intern — Systems Development and Automation

Sep 2025 – Present

- Develop and maintain internal systems, dashboards, automations, and integrations used in a corporate environment.
- Create and maintain MySQL queries, including the integration of Sienge ERP data into internal reports and dashboards.
- Connect user interfaces, databases, business rules, and automation workflows using JavaScript, Vue.js, Node.js, Node-RED, and Make.
- Support applications running on Ubuntu Server, Apache, PM2, and Cloudflare, as well as internal systems and users.

MTEC Energia — Young Apprentice — Systems Development and Automation

Sep 2024 – Sep 2025

- Contributed significantly to the initial development of e-simon, an internal management and monitoring solution for EV-charging operations in residential buildings.
- Built dashboards, forms, tables, filters, and registration workflows with JavaScript, Vue.js, HTML, CSS, Node-RED, and MySQL.
- Created automations with Node-RED and Make and helped develop and maintain the public e-simon website with WordPress and Elementor.

SELECTED PROJECTS

e-simon — Corporate Project — JavaScript, Vue.js, Node-RED, MySQL. Contributed to the development and evolution of a management and monitoring solution; source code and business data are private.

Full-Stack Portfolio | portfolio-kohl-mu.vercel.app — **React, TypeScript, Node.js, Express, MySQL.** Web application with separate frontend and backend, an admin dashboard, JWT/bcrypt authentication, Socket.IO updates, and a contact form.
